Conc.: Request for access to information under regulation 1049/2001, radioactive waste (DG ENER)

Gdańsk / Göteborg / Brussels, 08 March 2016

Dear Secretary General,

On behalf of Nuclear Transparency Watch, we hereby submit an application for access to information under Regulation 1049/2001/EC concerning the information held by the European Commission under Council Directive 2011/70/EURATOM art. 11 to 14.

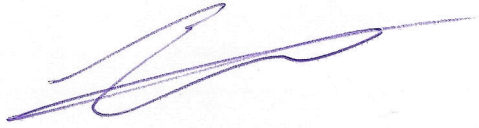

According to Article 11 of Council Directive 2011/70/EURATOM, Member States had to develop and describe a national programme for radioactive waste management and disposal, and the first programmes were according to art. 14 to be reported to the European Commission before 23 August 2015.

We request the following:

1. An overview of, and access to all national programmes as notified to the Commission under art. 13(1) 2011/70/EURATOM, and national reports received by the European Commission from the Member States under art. 14(1) 2011/70/EURATOM, published on a dedicated page on the internet (related to the <https://ec.europa.eu/energy/en/topics/nuclear-energy/radioactive-waste-and-spent-fuel> site).
2. A full break-down overview of all radioactive waste held by each Member State according to radioactive waste category (low-, mid-, high-level waste; short-lived, medium-lived, long-lived waste), as well as totals for each category for the EU. If such a breakdown cannot be given for certain Member States, we request the Commission to provide us with the explanation of the Member State why this information has not been reported.

We would like to receive the requested information in digital form (format .pdf, .doc or .odt), sent to the email addresses mentioned below.

Yours sincerely,

Jan Haverkamp
